

- | | |
|--|--|
| ■ tubulin binding | ■ translation factor activity, RNA binding |
| ■ ribosome binding | ■ sodium ion transmembrane transporter activity |
| ■ alpha-tubulin binding | ■ potassium ion transmembrane transporter activity |
| ■ ribosomal large subunit binding | ■ cyclin-dependent protein serine threonine kinase regulator activity |
| ■ translation initiation factor activity | ■ ligand-gated ion channel activity involved in regulation of presynaptic membrane potential |
